
a
Protein abundance as measured
b
After subtracting each age group's mean
Higher in remodeled kidneys
Lower in remodeled kidneys
Change with age only
9 mo
18 mo
21 mo
25 mo
Columns: rats, ordered within each age by remodeling score. Rows: 120 example proteins.
log2 vs 9-month mean
SD within age group

c
Two proteins before and after subtracting the age-group mean
HS3ST3A/B: rises with age, little spread within age
KIM-1: spreads widely within age
as measured
minus age-group mean
log2 vs 9-month mean
log2 minus age-group mean
Age (months)

d
All 11,485 proteins
OAT1
HS3ST3A/B
KIM-1
CD45
Proteins
Correlation with remodeling score (r)
e
Each rat's protein level within its age group against its score
CD45
r = +0.93
KIM−1
r = +0.72
NaPi−IIa
r = −0.78
OAT1
r = −0.75
Protein, SD within age
Score (SD)
9 months
18 months
21 months
25 months
